Bruno Landsberg
Sano Founder 1920-2017

“Mens Sana in Corpore Sano” A Healthy Mind in a Healthy Body

The vision that turned a small factory into a successful concern and the life's work of Sano founder Bruno Landsberg, who passed away last year. Sano produces an extensive range of products daily for maintaining the cleanliness, hygiene and health of millions of people in Israel and abroad.

Over sixty years ago, Bruno Landsberg established a small factory for cleaning products. The new company had only three employees who produced two new products: naphthalene mothballs in cellophane bags, and a toilet cleaning detergent in an opaque pink plastic bottle that was named “Sano” - a Latin word meaning “healthy” that appears in the expression “mens sana in corpore sano” - “a healthy mind in a healthy body”. The product became a success and the catchy name “Sano” became the brand name of all the company's products.

Sano's reputation has been maintained for over six decades during which the company developed and marketed thousands of different products in a diverse range of categories. These include laundry detergents, household care and maintenance products, air fresheners and perfumes, insecticides and domestic paper products.

Since its inception Sano has been guided by certain important principles: to provide effective and top quality solutions for all cleaning and maintenance problems, to preserve environmental quality, to promote equality for all its managers and employees, and to be constantly attentive to its customers. These same principles continue to serve as Sano's guidelines to this day. In 2022 Sano continues to innovate and to introduce a range of new and upgraded products that provide effective and quality solutions for household maintenance and cleanliness. Sano's website offers comprehensive information, tips and solutions that will help you maintain your home in the best way possible.

Sustainability and Product Quality Preservation

Sustainability in general and the preservation of environmental quality in particular have long since turned from being a social agenda into a way of life.

We too at Sano have a sustainability program that has three main goals:

- **To preserve environmental quality**
- **To preserve the safety and health of our employees and our customers**
- **To contribute to improving the quality of life in the community**

Preserving Environmental Quality

Sano has a special Environmental Quality team that focuses on projects designed to constantly improve all aspects of environmental quality and the preservation of natural resources. Sano was the first company in Israel to develop and manufacture a line of products with the Green Mark Standard, a unique certificate awarded by the Standards Institution of Israel and the Ministry of Environmental Protection.

All Sano employees are dedicated to preserving the environment. We call upon you to join in our efforts and to contribute to this endeavor through recycling, waste separation and following instructions on product labels to avoid wasteful use of our products. Sano was one of the first companies registered with the Manufacturers' Recycling Corporation (TAMIR), established following the introduction of the Packaging Waste Reduction Law -2011 for the collection and recycling of packaging material waste.

Preserving employee and customer safety

Sano has a special team consisting of the head of our Environment Preservation Department, our Safety Manager and our Standards Coordinator. The team's goals are to uphold the overall policy for risk and injury reduction and prevention for Sano employees while ensuring their health, the reduction and prevention of environmental pollution and for raising safety and environmental awareness among Sano's employees and guests.

Contribution to improving quality of life in the community

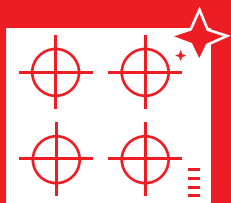

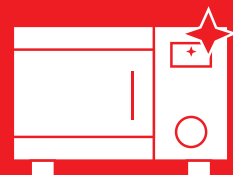

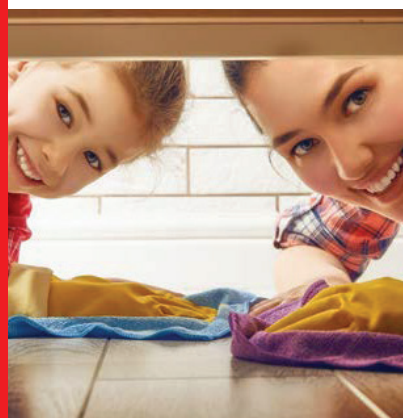

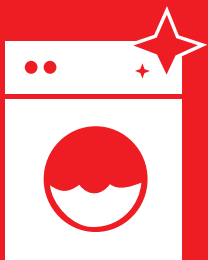

Sano has a long-standing record of contribution to improving of the quality of life in the community. This includes substantial donations to a range of cultural institutions and support for learning excellence in technological fields. Sano runs a comprehensive volunteer program to promote quality of life in the community.

The Prestigious Platinum Mark

Since 2011 Sano holds the prestigious Platinum Mark awarded by the Standards Institution of Israel for the company's excellence and ongoing environmental quality preservation efforts and its compliance with five quality standards: the Standard Mark, the Green Mark, ISO 9001:2005 for Quality Management, OHSAS 18001:2007 for Occupational Safety and Health Management, and ISO 14001:2015 for Environmental Management.

Quality Management Systems, Safety, Health and Occupational Systems, and Environmental Management Systems were approved as complying with the following standards: **ISO 9001:2008, ISO 14001:2004 OHSAS 18001:2007, The Green Standard**
